## **DETAILED ACTION**

### ***Specification***

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the closure with a second periphery portion that does not have a first snap fitting periphery portion (claim 22) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is considered vague and indefinite because the phrase "said first snap fitting periphery portion and said second snap fitting periphery portion for a complete snap fitting periphery of said lid" is

Art Unit: 3727

unclear and confusing. The dependent claims not specifically mentioned are rejected as being dependent upon a rejected base claim since they inherently contain the same deficiencies therein.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 13-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Philip (U.S. 4,394,928) in view of Philip (U.S. 4,322,014). Philip (U.S. 4,394,928) discloses the claimed invention except for the air hole being in the center of the disc. Philip (U.S. 4,322,014) teaches that it is known to provide a lid with an air hole (see element 16). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the closure of Philip (U.S. 4,394,928) with an air hole in the center thereof, as taught by Philip (U.S. 4,322,014), in better prevent the escape of liquid through the vent hole when the container is tipped.

***Allowable Subject Matter***

6. Claims 1-12 are allowed.

7. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach a lid having a bottom lid which mates with a portion of a snap fitting periphery of a circular disc, wherein the disc has an air hole in the center thereof and an engagement means on the underside of the disc between the air hole and the periphery, and wherein the bottom lid engages the engagement means of the disc.

Art Unit: 3727

The reference of Chu (U.S. 6,305,571) appears to be the closest prior art reference of record. However, Chu does not teach the air hole being in the center of the disc. The air hole of Chu could not be moved to the center of the disc without the use of improper hindsight reasoning and without destroying the reference. In addition, Chu does not teach the bottom lid mating with the snap fitting periphery of the disc. The bottom lid of Chu mates with the lid skirt above the snap fitting periphery.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

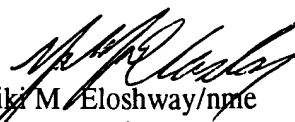

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the bottom lid member.

9. THIS ACTION IS NON-FINAL.

10. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703)305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account.
